METALLIC LAYER COMPONENT FOR USE IN A DIRECT OXIDATION FUEL CELL

Examiner: Yuan

S.N. 09/882,699

Art Unit: 1745

October 8, 2002

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, Claims 1-12 are drawn to a direct oxidation fuel cell comprising a membrane electrode assembly, an anodic metallic diffusion layer and a cathodic metallic diffusion layer.

Species II, Claims 13-22 are drawn to a direct oxidation fuel cell comprising a membrane electrode assembly, a gas separator, an anodic metallic diffusion layer and a cathodic metallic diffusion layer.

Species III, Claim 23 is drawn to a direct oxidation fuel cell comprising a membrane electrode assembly, means for distributing fuel and water mixture to the anode, and means for distributing oxygen to the cathode.

Species IV, Claims 24-62 are drawn to a direct oxidation fuel cell comprising a membrane electrode assembly and an anodic metallic diffusion layer.

Species V, Claims 63-70 are drawn to a direct oxidation fuel cell comprising a membrane electrode assembly, an anodic metallic diffusion layer, a source of fuel and a source of oxygen.

Species VI, Claims 71-92 are drawn to a direct oxidation fuel cell comprising a membrane electrode assembly and a cathodic metallic diffusion layer.

Species VII, Claims 93-103 are drawn to a direct oxidation fuel cell comprising a membrane electrode assembly, a cathodic metallic diffusion layer, a source of fuel and a source of oxygen.

Species VIII, Claims 104-109 are drawn to a direct oxidation fuel cell comprising a membrane electrode assembly, means for distributing fuel to the anode, and means for distributing oxygen to the cathode.

Species IX, Claim 110 is drawn to a means for generating electricity comprising a direct oxidation fuel cell means, means for providing oxygen to the cathode, means for providing fuel to anode, and means for coupling the anode to the cathode.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

2. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
